Теги, ключевые слова или словосочетания (минимум три слова) Spreadsheet error detection, Quality assurance, End-user programming, Human error in spreadsheets, Risk assessment

- Перечень фактов, упомянутых в статье (минимум четыре пункта)**
- The article reviews global research on spreadsheet quality problems, showing that most spreadsheet errors come from human mistakes and lack of testing.
- It highlights that spreadsheets are essential tools in companies, but many errors remain undetected, leading to financial and operational risks.
- The paper summarizes multiple error categories such as logic errors, data-entry errors, structural design flaws, and maintenance issues.
- It identifies that spreadsheet users are often non-professional programmers, which increases the likelihood of mistakes during development.
- Existing research provides testing methods, audit techniques, and automated analysis tools to improve quality

Позитивные следствия и/или достоинства описанной в статье технологии (минимум три пункта)

- The review aggregates numerous testing and auditing techniques, helping organizations **reduce spreadsheet-related risks** and improve reliability.
- It shows that structured methodologies (e.g., code inspection, model auditing) can significantly **decrease error rates** even for non-expert users.
- The article brings attention to the growing demand for **automated tools** that detect formula inconsistencies and structural anomalies, supporting safer decision-making.

Негативные следствия и/или недостатки описанной в статье технологии (минимум три пункта)

- Many quality-assurance techniques require specialized expertise, but most spreadsheet users are end-users without programming training.
- Existing automated tools still cannot catch all types of semantic or logical errors, especially in complex spreadsheet models.
- Organizations frequently lack formal processes, meaning that even with proposed methods, real adoption remains low.

Ваши замечания, пожелания преподавателю или анекдот о программистах

Same sheet, different day.
